## SUMMARY

---

Developer with one year of hands-on experience in building and maintaining web applications. Highly motivated, with a strong foundation in web developer, data analyst and database complemented by a commitment to teamwork and effective problem-solving. Skilled in creating efficient, user-friendly web solutions and excited about advancing in software engineering.

## EDUCATION

---

### BINA NUSANTARA UNIVERSITY

Jakarta, Indonesia

Computer Science - Bachelor of Science (GPA: 3.35 / 4.00)

September 2019 – April 2023

- Take special interest in Streaming: Database Technology
- Thesis: Design Of Web-Based Learning Media to Improve Learning Systems in Poris Indah Tangerang High School.
- Participated in INC 2020 in a team named GoGainer and placed 70th ranking of 700 team's National level.
- Winner of Designing UI/UX with Figma Competition (3<sup>rd</sup> place on campus level).

## EXPERIENCE

---

### PT. PURWANTO ASSET MANAGEMENT

Jakarta, Indonesia

Full Stack Engineer - Full Time

July 2023 – Present

- Developed an employee attendance and leave information feature for the company's information system using Golang, MySQL, and VueJS, automating data processing from attendance systems and machines for all users.
- Created a feature to view employee data and facilitate meeting room bookings within the system, streamlining processes for all users.
- Built a KPI evaluation backend and frontend using Golang to automate employee performance tracking and scoring.
- Developed a secure module for client (nasabah) data input and implemented a new mutual fund (reksadana) transaction feature for inflow and outflow operations, ensuring data validation, access control, and overall data security.

Programmer - Contract

January 2024 – July 2024

- Developed and enhanced company website features (career, webinars, blogs, products) using Google Analytics for visitor tracking.
- Built "Reksa Dana Online" (RDO) application for customer data validation and manual transaction validation.
- Created features in the corporate information system to validate digital documents and user data via VIDA.
- Analyzed and retrieved stock data from Bloomberg to Python, generating stock tables for Indonesian companies.

### PT. DIGERATI ATOMIC INDONESIA

Tangerang, Indonesia

Software Engineer – Contract

June 2023 – September 2023

- Able to complete application development on front-end and back-end developers to add and update features on the website using Laravel.
- Enter data from PostgreSQL and Golang into the SIP project website.
- Check and create programs and data from Back End (Golang) and PostgreSQL on the SIP project for retail companies.

### TELKOM INDONESIA

Jakarta, Indonesia

Web Developer - Internship

March 2022 – February 2023

- Successfully updated the SIIS and IBAM websites using the ReactJS programming language to add new features and pages to the web and maps, namely GIS (Geographic Information System).
- Input API data into ArcGIS on the SIIS 4.0 website and input API data on the IBM web page.
- I created a new website front end of Microdemand Survey CMS to add new page features to the website using ReactJS programming language.
