SUMMARY

Software Engineer with 3+ years of hands-on experience developing and maintaining web applications. Experienced in full-stack development, backend development, data analysis, and database management, with strong skills in Golang, Laravel, React.js, Vue.js, MySQL, and PostgreSQL. Strong problem-solving and teamwork skills with a focus on building efficient, scalable, and user-friendly web applications.

EDUCATION

BINA NUSANTARA UNIVERSITY Jakarta, Indonesia
Computer Science - Bachelor of Science (GPA: 3.35 / 4.00) September 2019 – April 2023

- Specialized in **Database Technology**.
- Thesis: **Design of Web-Based Learning Media to Improve Learning Systems at Poris Indah Tangerang High School**.
- Participated in **INC 2020** as a member of Team GoGainer, ranked **70th out of 700 teams** at the national level.
- Achieved **3rd Place** in a campus-level UI/UX Design Competition using Figma.

EXPERIENCE

PT. PURWANTO ASSET MANAGEMENT Jakarta, Indonesia
Full Stack Developer | Software Engineer - Full Time July 2024 – Present

- Built internal information systems using **Golang, Vue.js, MySQL, and Python**, including Employee Attendance & Leave Management, Employee Data & Meeting Room Booking, and a configurable **KPI Evaluation System** with automated attendance-based scoring and employee access to results.
- Developed a secure **Client/Nasabah & Mutual Fund Transaction Management System** supporting 100–250 clients, with data validation, access control, audit logging, client management, and agent/sales assignment.
- Built **Subscription, Redemption, and Switching** transaction workflows with automated validation and processing, real-time balance/position updates, and transaction history.
- Developed **NAV/AUM monitoring, Sales Target, and compliance reporting** workflows, including APU-PPT (Anti-Money Laundering & Counter-Terrorism Financing) and securities transaction settlement.
- Developed a **QR Code-based Document Verification** feature integrated with email templates, enabling users to verify and securely download original documents via OTP authentication.
- Built an automated **Document Folder & File Management** system using Python, organizing documents by document type, division, and date.
- Implemented **Microsoft Entra ID authentication** for the internal SIPAM application, enabling corporate account login across internal systems; contributed to the security evaluation for the on premises to Azure migration.

January 2024 – July 2024

Programmer - Contract

- Developed and enhanced the company's **corporate website** with Career, Webinar, Blog, Contact, and Product features, including Google Analytics integration.
- Developed the **Reksa Dana Online (RDO)** application for customer data management and mutual fund transaction validation.
- Developed a **Corporate Information System** integrated with VIDA Digital Signature for digitally signing company letters and documents.
- Implemented user **identity verification workflows** using email, phone number, NIK, and facial recognition, matching identity data against registered Dukcapil records via an integrated verification service.
- Built and maintained application workflows based on business requirements, focusing on data validation, document processing, and integration with external services.
- Conducted **stock market analysis using Bloomberg**, using Python to process and analyze extracted market data to support investment-related analysis.

PT. DIGERATI ATOMIC INDONESIA Tangerang, Indonesia
Software Engineer – Contract June 2023 – September 2023

- Developed and enhanced features for **SIP (Sales Force Automation)**, managing sales activities, customer data, orders, deliveries, and field operations.
- Worked across front-end and back-end layers using **Laravel, Go, and PostgreSQL**, integrating data between web applications and backend services.
- Developed backend services and **APIs in Go** for data processing, integrating them with the Laravel-based web application.
- Contributed to field sales workflows including customer management, order processing, scheduling, delivery, and activity monitoring.
- Collaborated closely with front-end and back-end teams to troubleshoot integration issues and maintain reliable service communication.
- Contributed to the development and maintenance of a **retail company website**, implementing new features and integrating backend data.

TELKOM INDONESIA	Jakarta, Indonesia
Web Developer - Internship	March 2022 – February 2023
- Developed and enhanced features and pages for SIIS and IBAM web applications using React.js. - Integrated GIS functionality and ArcGIS API data into SIIS 4.0 to support location-based visualization and analysis. - Integrated API-driven data into IBAM web pages and contributed to front-end data presentation. - Developed front-end features for CMS Survey Microdemand, translating requirements into responsive web interfaces. - Collaborated with the development team to maintain existing applications and deliver new functionality across multiple internal web platforms.	

ORGANIZATION

BINA NUSANTARA COMPUTER CLUB	Tangerang, Indonesia
Organization - Learning and Training Staff	August 2020 – February 2022
- Developed curriculum, class materials, and schedules for learning and training programs. - Organized and supported Information Technology-related events. - Managed attendance for Learning and Training classes.
